Patterns

The first step to successful fishing is choosing the right pattern. A pattern is a specific combination of flies, lures, or bait that is designed to attract a particular species of fish. The best patterns will vary depending on the time of year, the water conditions, and the type of fish you're targeting.

Here are a few of the most popular patterns used by anglers in our state:

- **Dry flies:** Dry flies are designed to float on the surface of the water, and they are often used to imitate insects that fish feed on. Some of

the most popular dry flies include the Adams, the Parachute Adams, and the Royal Wulff.

- **Nymphs:** Nymphs are designed to imitate the immature stages of aquatic insects, and they are often used to fish below the surface of the water. Some of the most popular nymphs include the Hare's Ear, the Pheasant Tail, and the Copper John.
- **Streamers:** Streamers are designed to imitate small fish, and they are often used to cast into pools and runs. Some of the most popular streamers include the Woolly Buzzer, the Clouser Minnow, and the Zonker.

Rigs

Once you've chosen a pattern, you need to choose a rig. A rig is a combination of line, leader, and terminal tackle that is designed to present your pattern to the fish in the most effective way possible. The best rigs will vary depending on the type of fishing you're doing and the conditions you're fishing in.

Here are a few of the most popular rigs used by anglers in our state:

- **Dry fly rig:** A dry fly rig is a simple rig that consists of a leader and a tippet. The tippet is the fine, tapered line that connects the leader to the fly. The length of the tippet will vary depending on the conditions, but it is typically between 6 and 9 feet long.
- **Nymph rig:** A nymph rig is a more complex rig that consists of a leader, a tippet, and a strike indicator. The strike indicator is a small, buoyant object that helps you to detect when a fish has taken your

nymph. The length of the tippet and the size of the strike indicator will vary depending on the conditions.

- **Streamer rig:** A streamer rig is a versatile rig that can be used to fish in a variety of conditions. A streamer rig typically consists of a leader, a tippet, and a weighted streamer fly. The weight of the streamer will vary depending on the depth of the water you're fishing.

Advice

In addition to choosing the right pattern and rig, there are a number of other things you can do to improve your fishing skills. Here are a few tips from the state's best anglers and guides:

- **Be patient:** Fishing is a relaxing sport, but it can also be frustrating at times. The key to success is to be patient and to keep trying. Even the best anglers have days when they don't catch a fish.
- **Learn from your mistakes:** One of the best ways to improve your fishing skills is to learn from your mistakes. If you're not catching fish, try changing your pattern, your rig, or your location. Keep track of what you're doing and what works, and what doesn't.
- **Ask for help:** If you're struggling to catch fish, don't be afraid to ask for help from a friend, a family member, or a guide. There are many people who are willing to share their knowledge and experience.

By following the advice in this article, you can improve your fishing skills and catch more fish. Remember, the key to success is to be patient, to learn from your mistakes, and to ask for help when you need it.
